

M-02.0 ENVIRONMENT POLICY

Conceptual framework

- To develop, produce and sell freezer / refrigerators for domestic and commercial use, and negotiate purchased white, which, together with our services is a quality that can satisfy customers' needs, its own requirements and regulatory compliance.
 - Have an income that ensures the company's continued existence and expansion.
 - To maintain a workplace that employees can be satisfied with.
- Environmental Policy

Environmental Management System includes the business activities, resulting from Elcold's ideals.

We need to minimize internal and external environmental impact.

Elcold will:

- Continuously improve our environmental performance and effort and prevent pollution.
- Comply with applicable regulatory requirements and agreed codes of practice.
- Utilize processes, energy and materials effectively and use resources sustainably.
- For information, communication, education and training to encourage employees to exercise high environmental awareness.
- Encourage employees to make suggestions for environmental improvements.
- Encourage suppliers to act in an environmentally sound manner.
- Begin to include "cradle to grave" view of developing new products and vedligeholdelse existing, as well as compliance with recent legislation.
- Encourage external craftsmen who work for Elcold to act environmentally sound.
- Ongoing gemmængø environmental objectives and targets.

Environment evaluated annually and is available to the public.
